

Digital control options for adjustable beds
Adjust the bed with a mobile device

Join our digital journey

It is a fact that nowadays your smartphone acts as the remote to your life. So why not let your customers use it to adjust their bed as well?

Following this trend, we not only offer wireless hand controls but also digital solutions, enabling you to adjust your comfort bed via a mobile device. All based on Bluetooth® wireless technology.

Explore three different options

We offer three different digital control options for adjustable comfort beds. However, the best solution for you depends on your circumstances and your needs. We have a free option available now, one where an app can reflect your brand in only three steps, and the last option where you can completely tailor an app.

Are you ready to offer your customers a digital control option? Whatever your needs, we have a solution for you.

Product	Choose this if...
 <p>LINAK® Standard Bed Control App Page 3-4</p>	<p>- you want to offer a digital control option that is free and available in app stores today.</p>
 <p>Customisation of the Bed Control App Page 5-8</p>	<p>- you want to offer a digital control option that reflects your brand. It has to be easy and at a minimal cost.</p>
 <p>LINAK® Software Development Kit Page 9-11</p>	<p>- you want to offer a tailored digital control option that reflects your brand. It has to have other functionalities than the Bed Control App as well as a different layout and interface.</p>

The Standard Bed Control App

Free app solution - always up-to-date

The Standard LINAK® Bed Control App is free and available in the app stores today. We continuously keep the app updated with all the latest functionalities.

This app is perfect for those who want to offer a digital control option for comfort beds. It is easy to install, pair, and to use.

Bed Control App functionalities

Independently operate two beds and control the right and/or left side of the bed

Simultaneous Drive

4 favourite positions:
(if supported by the product)

Massage:
(if supported by the product)

Select back, leg, foot or neck

Adjust up or down

Turn Under Bed Light on/off

More includes:

Reset to factory default

Troubleshooting guide

Automatic drive (on favourite positions)

Multiple languages

Alarm:
Wake-up to favourite position and/or massage

The Standard Bed Control App

Everything made easy with intuitive user interface

The Bed Control App is simplified in a way that means the functionalities are highlighted and nothing unnecessary is included. This improves user-friendliness.

As if that was not enough, the app initiates by presenting two things: an easy guide on how to pair the product with your phone

and a simple onboarding flow where you choose the number of motors in your bed and whether you have massage or not.

The interface in the Bed Control App will adapt according to these choices and include memory positions depending on the connected products.

Examples of different options depending on the product:

User interface for
TWINDRIVE® **standard**
dual actuator systems

User interface for
TWINDRIVE® **advanced**
dual actuator systems

Do you want to try the Bed Control App?

Download the Bed Control App for both iOS and Android. Just look for the icon in the Apple® App and Google® Play store*.

The customised Bed Control App

Everything made easy with intuitive user interface

Customising the Standard Bed Control App is for those who wish to offer a digital control option that maintains brand awareness with their customers. Most importantly, it has to be as easy as possible.

In three simple steps you can offer a digital control option with high brand visibility. To make an app reflect your brand, simply choose a logo, a background and two links.

3 simple steps:

- Logo
- Colour
- Links

The customised Bed Control App

Create brand awareness with logo and colour

Increase brand awareness with your customer by simply changing the background colour of the app and choosing a logo for the splash screen and the top left corner in the app. The graphics in the app remains white.

Align the visual identity of the Bed Control App with, for instance, a specific product line, to make it crystal clear who is responsible for the comfort experienced by the user. Whether you want a company logo or a specific product line or brand - the choice is yours.

The first thing you see is the splash screen. Show your brand here.

Change the logo in the top left corner of the control page. Ensure constant brand visibility.

Change the background colour of the app.

The LINAK® Software Development Kit

Design your own Bed Control App to meet customer needs

LINAK Software Development Kit (SDK) is the solution for those who want to tailor an app more than is possible with the simple customisation of the Bed Control App.

The SDK allows you to develop your own app that suits your exact range of beds and meets the needs of you users. All you need is a good idea and an app developer to use the kit – LINAK delivers the base. We offer 2 different platforms for comfort beds: iOS and Android.

The LINAK® Software Development Kit

Stand out with a unique app in LINAK quality

Create a unique app

Be able to develop your own app that suits your exact range of beds and meets the needs of your users.

Get your own app in the app stores

Customers will be able to search your name or brand in the app stores.

Save both time and money with the LINAK SDK

The LINAK SDK ensures that the connection between the app and our products is tested.

In other words, when building an app for comfort beds equipped with LINAK systems, you save both money and time by using the LINAK SDK.

The LINAK® Software Development Kit

Add your own unique features

Does your range of beds have features other than the LINAK Standard Bed Control App supports? Then you can use the SDK to design an app that is tailored to your needs. i.e. you can use the SDK to control beds with hi-lo, trend/anti-trend or push notifications. What is more, when using the SDK it is possible to create a completely different layout of the app.

Hi-lo:

The entire bed moves up or down

Trend/anti-trend:

Tilt the angle of the bed

Push notifications:

Get notifications on the smartphone

Your own graphics:

Be able to create a completely customised layout

And many more

Do you have a vision?

Please contact your local LINAK® office for more information about the LINAK Software Development Kit.
